

Bayu Putra Pamungkas

Bandung, West Java, Indonesia | +62 81210621639 | bayu000111222@gmail.com
Portfolio: <https://bayuportfolio.vercel.app> | GitHub: github.com/amamat20

PROFESSIONAL SUMMARY

System-oriented developer with a strong foundation in web development and AI/ML applications. Experienced in building scalable systems, designing backend architectures, and developing data-driven solutions from data processing to deployment. Focused on delivering efficient and reliable systems with a strong problem-solving mindset and collaborative approach.

PROJECTS

MITIGATE – Earthquake Resilience Decision Support System | [GitHub](#)

- Developed a decision support system for evaluating residential earthquake resilience based on SNI 1726:2019 standards
- Modeled rule-based logic to estimate building resistance against earthquake magnitude using user-defined structural parameters
- Implemented geospatial visualization to aggregate and classify area-level risk (e.g., RW) using color-coded indicators (high, medium, low)

Kopeg – Cooperative Management System | [GitHub](#)

- Led the end-to-end development of a web-based cooperative management system utilizing real-world operational data
- Designed backend and database architecture to ensure efficient and reliable data processing
- Developed full-stack features to manage member and financial data, supporting daily business operations

Sleep Health Prediction System | [GitHub](#)

- Built an end-to-end machine learning pipeline, from data preprocessing to model evaluation
- Developed a classification model to predict sleep disorders from real-world health and lifestyle data, achieving ~92% accuracy
- Integrated the model into a web-based system for real-time prediction and user interaction

EXPERIENCE

PT Langgeng Sejahtera Kreasi Komputasi (LSKK)

Software Engineer Intern | Jan 2022 – Jul 2022

- Developed a responsive landing page for a startup incubator platform, improving UI/UX, cross-device compatibility, and performance
- Built a web-based teacher-facing student monitoring dashboard, enabling management of classes, assignments, attendance, and student profiles

Politeknik Manufaktur Bandung – E-Commerce System with 3D Product Configurator

Full-Stack Web Developer | Feb 2026 – Present

- Developed scalable end-to-end web-based systems using Next.js, Laravel, and PostgreSQL
- Designed database architecture and RESTful APIs to manage complex and dynamic data
- Built responsive admin interfaces to streamline data management and improve system usability
- Collaborated with Politeknik ATK Yogyakarta and local leather SMEs to align digital customization with real-world manufacturing processes

SKILLS

Technical Skills

Programming: Python, PHP, JavaScript, C++, Java, Kotlin

Frameworks: Next.js, React, Laravel, Django

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Tools: Git, Docker, Arduino IDE

Languages

Indonesian – Native

English – Limited Working Proficiency

EDUCATION

Politeknik Manufaktur Bandung

Bachelor of Applied Science in Industrial Informatics Engineering Technology

2023 – Present | GPA: 3.66 / 4.00

Scholarship: Jenius Jabar Scholarship Recipient, Awarded based on academic performance (GPA ≥ 3.65) and organizational involvement

SMK Negeri 2 Bandung
Software Engineering
2020 – 2023

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Mekatronika Otomasi (HIMAMO)
Cadre Development Division Member | Jan 2024 – Present

- Participated in planning and executing cadre development programs and onboarding initiatives
- Supported member development by fostering teamwork, leadership, and organizational values
- Served as Deputy Evaluation Coordinator during faculty orientation

CERTIFICATIONS

- Applied Data Science with Microsoft Fabric – Dicoding
- Generative AI Application Development – Microsoft Azure (Dicoding)
- Machine Learning Fundamentals – Dicoding
- Backend Development – Dicoding
- Cloud Practitioner Essentials (AWS) – Dicoding
